

SCOTTISH HEALTH INNOVATIONS LTD (SHIL) STRATEGY 2021 – 2026

OUR VISION

An entrepreneurial, collaborative Scotland where healthcare innovation thrives

OUR MISSION

To inspire, accelerate, and commercialise impactful healthcare innovations for health, economic and social benefit

STRATEGIC THEMES AND OUTCOMES

A CONNECTED, COLLABORATIVE COMMUNITY

- Enhanced digital accessibility, training and networking to support connectivity and collaboration across the sector.
- Extend innovation and entrepreneurship competence across the sector through the development of a Clinical Entrepreneur training programme.
- Robust, trusted relationships across NHS Scotland where national reach is complemented with targeted health board engagement to provide equity of access to services and expertise.
- Expert input to industry and academic led innovation activity with commitment to assessing and supporting viable ideas from those working outside NHS Scotland.
- An ability to demonstrate the value of NHS supported innovation to position Scotland as an entrepreneurial, collaborative nation, where healthcare innovation thrives.

HARNESSING EXPERTISE FOR OPTIMAL INNOVATION

- An expert, full service innovation advisory capability adaptive to new policy rules, regulations, market conditions and emerging technologies.
- A regulatory framework and Quality Management System to support the design and development of medical devices, and manage the process from initial evaluation of a concept to regulatory approval and rapid market adoption.
- Contribute knowledge, and add value, to pan-Scotland initiatives to support innovation, such as Small Business Research Initiative (SBRI) assessments.
- Extend the knowledge and support offered by SHIL to harness and capture the innovation potential of the social care and private healthcare sectors.

ACCELERATING A BETTER HEALTHCARE FUTURE

- A robust and transparent innovation process empowering innovative ideas from primary, secondary and tertiary healthcare staff and external entrepreneurs.
- A growing pipeline of high-quality innovations with targeted innovation calls to realise major advances in areas of unmet health need.
- Launch a Healthcare Accelerator Fund to provide financial assistance in the early stage development of projects that show commercial potential.
- Provide new pathways for in-demand innovations to achieve market readiness and acceptance and rapid adoption.
- Bring innovations of substance and scale to market in investor-ready form.

DELIVERING A HEALTHY OUTLOOK WITH REAL VALUE

- Generate an income stream to NHS health boards through financial returns on co-development projects.
- Work with academic and industry partners to support appropriate accelerator programmes that promote the growth of innovative health start-ups.
- Hold equity in NHS spin-outs to help create jobs, attract investment and position Scotland as a thriving and leading life science destination.
- Work with manufacturers and NHS spin-outs post-commercialisation to extend sales and optimise value.
- Develop social and economic value measures to evidence wider benefits of successfully commercialised health innovations.
